

COMMITMENT TO HEALTH AND WELLNESS

Neo7Bioscience is a precision molecular solutions company specializing in molecular health data surveillance and personalized peptide engineering. Neo7 does not diagnose or treat disease, nor does it interfere with the physician's right to practice or the patient's right to choose. Neo7Bioscience does not manufacture peptides. All peptides are manufactured by a certified specialized peptide manufacturer in a cGMP facility in compliance with FDA standards, prescribed by Neo7-participating health-care practitioners, and dispensed through a licensed pharmacy.

SpikeX Detect ANALYSIS AND DESIGN

mRNA Vaccine-Related Injury and Complications

**PRECISION AND
PERSONALIZED
PEPTIDE SOLUTIONS**

Advanced Molecular Surveillance & Personalized Peptide Engineering for mRNA Vaccine Complications

Neo7Bioscience is at the forefront of N-of-1 molecular surveillance and patient-specific engineered peptides, addressing the complex consequences of mRNA vaccine-induced disruptions, including:

- Vaccine-Acquired Immune Deficiency Syndrome (VAIDS)
- Spike Protein Aberrations and Translational/Transcriptional Dysregulation
- Accelerated Oncogenic Signaling ("Turbo Cancer")
- Systemic Inflammatory and Autoimmune Dysregulation

For Physicians & Researchers

- Precision Molecular Diagnostics – Utilize RNA differential expression analysis and protein signaling data to uncover individualized vaccine-related disruptions.
- Patient-Specific Peptide Engineering – Develop and apply tailored peptide therapies to restore cellular function and immune stability.
- Collaborate & Innovate – Join a network of experts advancing precision medicine solutions for complex post-vaccine complications.

For Patients Seeking Solutions

- Comprehensive Molecular Surveillance – Identify the specific transcriptional and immune disruptions affecting your health.
- Engineered Peptide Therapies – Targeted interventions designed to correct your unique molecular abnormalities.
- Data-Driven Recovery Strategies – No one-size-fits-all treatments—your therapy is designed specifically for you.

Take the Next Step

For Physicians & Researchers: Collaborate with us in developing and delivering next-generation peptide therapies.

For Patients: If you are experiencing immune dysfunction, cancer progression, or inflammatory disorders post-mRNA vaccination, explore a personalized recovery plan.
